

CS Infra

**A trusted name in
Road Safety**

ABOUT US

Road safety remains a concern for Indian citizens mainly because of the indifferent attitude of public while negotiating with the roads and absence of proper instruments which will enhance the safety measures. Road safety measures are unexplored area but it should be given topmost priority to save lives & avoid other casualties.

CS INFRA started its journey about 4 years ago with a motive of developing newer ideas regarding road safety & successful implementation of those. Till today, CS INFRA has successfully implemented 40+ projects all over West Bengal and other parts of India, entrusted upon it by leading Govt & private entities. Being the converter and distributor of 3M & Kataline Infra Products Pvt Ltd., it is encouraging other agencies to come up and contribute themselves in the work of safety.

CS INFRA always thrives for excellence and believes in 'service before self'. Today it has marked itself as pioneer in the field of road safety. For it the sky is the limit with many more things to do and it vows to carry the baton forward.
